

A highly concentrated acid detergent cleaning compound. Formulated for aluminum and other non-ferrous metal surfaces such as aluminum truck, bus, and trailer bodies and designed specially for jobs where regular alkali cleaners won't work.

**DIRECTIONS:** For normal cleaning jobs make a solution of 3 to 6 ounces per gallon of water. For heavy soiled and oxidized aluminum surfaces increase concentration to 10 to 15 oz. per gallon of water. To prevent streaking, apply the cleaning solution to the surface from the bottom upward. Rinse the surface before the solution dries.
